

ELECTRIC VEHICLE CHARGING STATIONS

Warner Bros. is committed to energy conservation and invests in renewable energy projects. One tangible effect of that commitment is an extensive number of Electric Vehicle (EV) Charging Stations in support of those who drive electric vehicles. Although the program continues to expand, it is becoming increasingly popular, and access to EV chargers is still on a first-come, first-served basis.

The intent of our EV program is to provide “top-off” charging. The parking spots around the chargers are reserved for charging EVs and plug-in hybrids only. They are not to be used for all-day parking, or for vehicles that are not actively utilizing the chargers. **The time limit at these charging stations is 4 hours; after that, you must move your vehicle to a standard parking space.**

Most people utilize the charging stations in a fair manner and are mindful of our parking regulations. If you do forget to move your vehicle, your card will be charged a penalty of \$2.00 per hour for any hours (or partial hours) above the 4-hour maximum time period. As with other non-compliance issues, repeat offenders may lose all parking privileges on the Lot.

Our EV vendor is ChargePoint, a nationwide provider of EV stations and services. They use a dual-head technology that allows us to provide double the capacity in the same sized footprint. In addition, participants can use their ChargePoint card at any available ChargePoint facility nationwide.

Charging fees will be **.20 cents per kilowatt hour, with a 4-hour maximum stay**. This per kilowatt hour charge is intended to cover the cost of your power usage and is comparable to, (or possibly lower than), the fee many other companies charge in Southern California.

Our charging stations consist of two ports per unit, and are located in the following parking areas:

GATE 8: Forest Lawn Parking Garage – 6 ports

LOT A: Bridge Parking Structure – 8 ports

GATE 3: Parking Structure – 6 ports

LOT H: – 4 ports

LOT G: Warner Blvd. – 4 ports

Bldg. 160: Studio Plaza – 4 ports

Bldg. 118: Triangle – 2 ports

Bldg. 154: Glass – 2 ports

Bldg. 151: ITD – 2 Ports

WB Ranch: – 4 ports

There are also 14 dual-head EV stations surrounding various Stages on the Main Lot, which require a separate approval process. These units are only available to the productions renting those stages. If you have questions, please call 818-954-7275, and ask for Chris Owens.

Please see below for signup details, as well as Frequently Asked Questions:

FAQ:
EV Charging at Warner Bros Studios

1. *How do I sign up?*

(a) **NEW CHARGEPOINT USERS:** Please go to the ChargePoint website, as follows: <https://www.chargepoint.com/drivers/join/> and register for a new account. Use the code “**WB1234**” to join the “**Warner Bros. Connections Group**.” You will receive an email notification once your registration process is completed and approved. If you don’t have a ChargePoint card, please visit Office Services, located in Building 44, on the ground floor, Suite 1560. (We are on the south side of the breezeway, next to Payroll.) Although some prefer to swipe their phones, you will need the card if you’re parked deep underground, or in an area with limited cell phone service.

(b) **EXISTING CHARGEPOINT USERS:** Login at <http://chargepoint.com/join/>. Go to the **Connections** tab (<https://na.chargepoint.com/connections>) and input the following Studio code: “**WB1234**.”

The screenshot shows the ChargePoint website interface. At the top, there's a navigation bar with 'Dashboard', 'My Stats', 'My Account', and 'Connections'. The 'Connections' page has a heading 'Got a Connection Code?' and a sub-heading 'If you've been provided a Connection Code by an organization (such as your employer), enter that code here to make their Connection offer visible to you.' Below this is a text input field with 'WB1234' entered, an 'Apply' button, and a 'Reset' button. At the bottom, there's a table with columns: Organization, Benefits, Available To, Information Required, Connect, and Status.

Please note: Parking Services must verify your account. Once approved, you will receive an e-mail notification that you have access to the “Warner Bros. ChargePoint Connections Group.” Your existing ChargePoint card will then work on the Studio’s EV charging stations.

2. *What type of charging stations are being provided?*

Warner Bros. has **Level II** EV charging stations available for your use with the capacity to provide up to **6.5 kilowatts of power** to your EV. However, the speed of the charge depends upon multiple factors, including the capability of your EV’s on-board charger and the building’s power supply.

3. *How long can I charge my car, and what does it cost?*

These EV charging stations are for “**top-off**” charging only, and are available up to 4 hours daily per vehicle. Primary EV charging should still occur at home. A **.20 cent per kilowatt hour fee** will be assessed to all vehicles using the Studio’s EV stations.

4. Does one plug fit all cars?

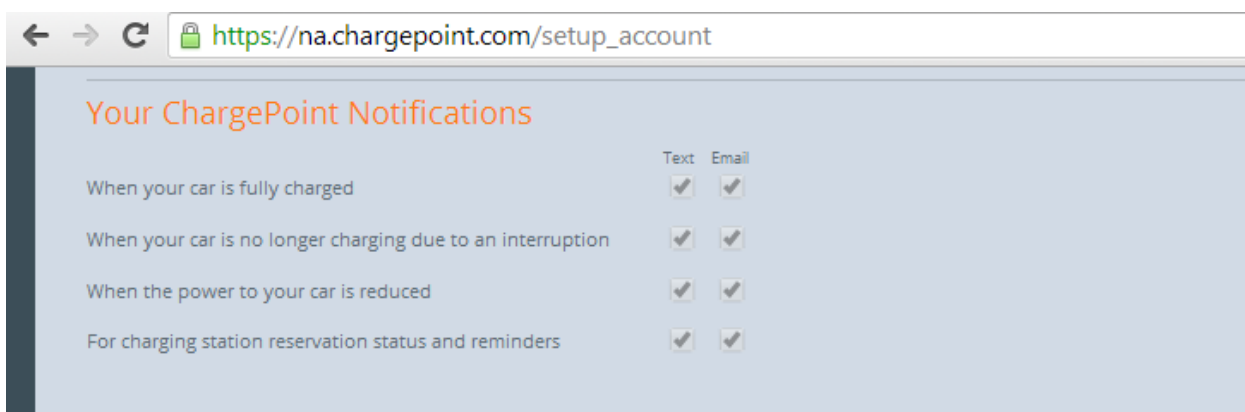

Our charging stations incorporate the **SAE J1772** (aka the “J” plug), which is the North American standard for electrical connectors. Nearly all EVs are able to plug into a Level II charging station. (Examples: BMW Active & i3; Chevy Bolt & Spark; Coda; Fiat 500E; Ford Focus; Honda Clarity, Hyundai Ioniq; Jaguar I-PACE; Kia Soul; Mercedes Hybrid; Mini Coop SE; Nissan Leaf; Smart Leaf; VW e-Golf; Audi A3; Cadillac CT6; Chrysler Pacifica; Honda Accord & Clarity; Karma Revero; Kia Niro & Optima; Mitsubishi Outlander; Porsche Cayenne & Spyder; Toyota Prius.) Tesla vehicles have a different standard, but the car comes with a “J” plug adaptor. Check with your vehicle manufacturer for details.

5. How do I activate the charger?

- Swipe your ChargePoint card over the RFID reader on the front of the unit.
(ChargePoint also has a free [SmartPhone application](http://www.chargepoint.com) available at www.chargepoint.com which can be used for activating your session.)
- Once activation is confirmed, then the charge session is ready to begin.
- Plug the power cable from the ChargePoint charger into your vehicle.

6. Will I need to move my car if I am done charging, and is there a penalty?

You will be required to move your vehicle after 4 hours, whether your car is fully charged or not. *The space you are occupying is a charging spot - not a parking spot.* We encourage you to turn on “ChargePoint Notification” to alert you when your car is fully charged, which will prompt you to move your vehicle as soon as possible. **A \$2.00 per hour penalty fee will be assessed for any vehicle remaining in an EV space after the 4-hour time limit.**

7. Who do I contact for more information?

For additional program information, please contact Parking Services, at 818-954-7275, and ask for Chris Owens or Helene Beal.

8. Who do I contact if I need assistance at the EV charging station?

For assistance with all your vehicle charging needs or after hours help, please contact the *ChargePoint* Call Center at 888-758-4389. You may also email ChargePoint at support@chargepoint.com. Please be ready to provide your account name and user ID.

9. Can I use my ChargePoint card for multiple EVs?

Yes, the ChargePoint card is linked to your account and it can be used for multiple vehicles.

If you have any questions please contact the Parking Office, at 818-954-7275, and ask for Chris Owens or Helene Beal. You may also email chris.owens@warnerbros.com or helene.beal@warnerbros.com.
